DETAILED ACTION

Claims 9-11 are presently pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-10, drawn to a method of increasing/maintaining the blood supply to a penis, comprising the administration of a nucleic acid encoding VEGF to a suitable cell in the subject's penis, classified in class 514, subclass 44.
- II. Claim 11, drawn to a method to increase or maintain a blood supply to a genital area of a female, comprising administration of VEGF, classified in class 424, subclass 198.1.

The inventions are distinct, each from the other because of the following reasons:

Invention I is patentably distinct from invention II. Inventions are patentably distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together, and require different structural considerations, which yield different modes of operation. To wit, Group II requires the administration of VEGF, while Group I requires administration of a nucleic acid encoding VEGF. Each requires different considerations, as the nucleic acid must be incorporated and expressed, while the protein must reach the site of action. The structure therefore provides for different modes of operation and functions. Moreover, as one requires treatment of the penis and the other group requires treatment of the female genital area, the forms of administration are inherently distinct and require distinct, non-coextensive search and

examination considerations. Lastly, such is not co-extensive, and requires distinct non-coextensive search and examination consideration that would pose a serious burden on the examiner to search and examine any two groups together.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
